From  
Aviation-Related  
Businesses

**Air Visitor Benefits**  
From  
Off-Airport  
Spending

# CALCULATION OF TOTAL BENEFITS

Benefit Source	Output	Income	Employment
On-Airport	\$161,917,000	\$62,931,000	801
Airpark (Aviation)	\$202,068,000	\$64,943,000	903
Air Visitors	\$54,228,000	\$21,652,000	577
<i>Direct Benefits</i>	\$418,213,000	\$149,526,000	2,281
Multiplier Benefits*	\$269,447,000	\$92,012,000	1,698
<b>TOTAL BENEFITS</b>	<b>\$687,660,000</b>	<b>\$241,538,000</b>	<b>3,979</b>

*\*Multiplier Benefits calculated from IMPLAN input-output model using Maricopa County coefficients and data from U.S. Bureau of Economic Analysis*

# GROWTH OF BENEFITS: 2019 VS. 2014

*(Inflation-Adjusted Percent Change)*

Benefit Source	Output*	Income*	Employment
On-Airport	13.0%	50.3%	36.2%
Airpark (Aviation)	27.4%	24.3%	10.4%
Air Visitors	16.3%	35.9%	27.7%
Multiplier Benefits	21.9%	4.8%	5.9%
<b>TOTAL BENEFITS</b>	<b>20.7%</b>	<b>22.2%</b>	<b>14.9%</b>

*\*Inflation adjusted growth in output and income based on Consumer Price Index, CPI-U, U.S. Bureau of Labor Statistics*

# Catalytic (Spin-Off) Benefits

Air transport's most far-reaching economic contribution is via its contribution to the performance of other industries and as a facilitator of their growth. These 'catalytic' or 'spin-off' benefits of aviation affect industries across the whole spectrum of economic activity.
